HOW DOES IT WORK?
Idaho State University and the Idaho College of Osteopathic Medicine have partnered to offer ICOM students the opportunity to complete a Master of Science in Health Informatics (MSHI) degree while pursuing their DO degree through co-admission and co-enrollment.

HEALTH INFORMATICS
Idaho State University’s cutting-edge MSHI program offers an affordable education featuring numerous opportunities for field experience and professional development.

Health Informatics develops innovative ways to utilize information and knowledge to facilitate actionable change that will promote health and improve healthcare.

DO + MSHI
Concurrent Program
Curriculum

ICOM students must receive approval from the Student Success Committee & the Dean to enroll. After receiving internal approval, ICOM students must also meet the admissions requirements set by Idaho State University.

Why Pursue a MHSI?

Earning a Master of Science in Health Informatics (MSHI) degree along with your DO degree will enhance your understanding of Health Informatics concepts essential to transform data into information and knowledge in order to make informed medical decisions, enhance outcomes, advance medical research, empower patients and enrich society.

Program Goals

Upon completion of the MSHI degree, students will be able to implement and manage Health Informatics solutions in ways that respect the prevailing culture, organizational context and policies relating to health; assess the information technology needs and resources of patients, organizations and communities, and more!

Application Process

Approval
ICOM students must receive approval from the Student Success Committee & the Dean to enroll.

Acceptance
After receiving internal approval, ICOM students must also meet the admissions requirements set by Idaho State University.
